Description

In Human Design, Reflectors play an integral part in the world. They are not designed to go with the status quo and when they begin to live authentically, Reflectors move humanity forward with their objectivity and wisdom. Reflectors are the only ones with the ability to sample the energies of the people around them but not become conditioned by them. This type of person sees great hope in humanity and can feel the nature of all living things in spite of their conditioning. Because they walk through life with a “Teflon” aura, they are the ones who see the beauty and potential of the world even when most of humanity has forgotten the true value of life and how to live authentically. Reflectors are the rarest of all the Human Design types and their journey isn’t always the easiest. This book responds to the need for Reflectors to have a tangible guide to help them work with their design so they can learn how to be strong, capable, and live a happy and healthy life.
